

VICO SERVO

Traction-pressure ageing bench

Control of the watch movement functions

- + Accelerated aging test
- + On-board intelligence
- + Simple and fast programming

► AGING PROCESS

► Inspection equipment

► Special machinery

► Watchmakers tools

VICO SERVO

AGING TEST BENCH TRACTION / COMPRESSION

ACCELERATED AGING OF CHRONOGRAPH AND SHENK NOTCHING FUNCTIONS

Device for carrying out all accelerated aging tests based on traction - compression of the winding rod, pushers and correctors according to [user-defined cycles](#).

The "servo" module allows you to [measure the force](#) required to operate the various functions.

- + **Interchangeable rotary bases** for movements, modules or watch heads.
- + **Each station** can be programmed and operated easily and completely independently
- + **SERVO V0.1 software** for creating test recipes dedicated to each station
- + **Quick, manual learning** of the various positions to be reached
- + **On-board intelligence** eliminates disruptions caused by PC updates or shutdowns
- + **Communication via web browser** without software installation (compatible PC, MAC, Linux)

Specifications	Units	Vico Servo
Number of stations	-	5
Precision of the linear positionnement	µm	± 0,10
Stroke	mm	30
Positionnement resolution	µm	1
Rated force / maximal	N	20 / 60
Fixation of movements	-	Specific interchangeable fixtures
Embasis rotation	-	Clockwise and counter-clockwise, 360°
Communication interface	-	Ethernet
Dimensions (L x P x H)	mm	850 x 520 x 320
