

Simulateur de portée - 800 Mouvements si

# GYROLAB

- Configurable range simulator -  
Simultaneous arming of 800 watch heads

Faithful reproduction of the  
automatic winding of the watch  
movement

SWISS  
MADE

- + Programming cycles
- + 2 independant stations
- + Loading from 1 to 800 watch heads
- + Multiple settings
  - Speed
  - Position (number of revolutions)
  - Acceleration
  - Deceleration

▶ AGING PROCESS

▶ Special machinery

▶ Inspection equipment

▶ Watchmakers tools

Simple loading structure adaptable to all types of packaging

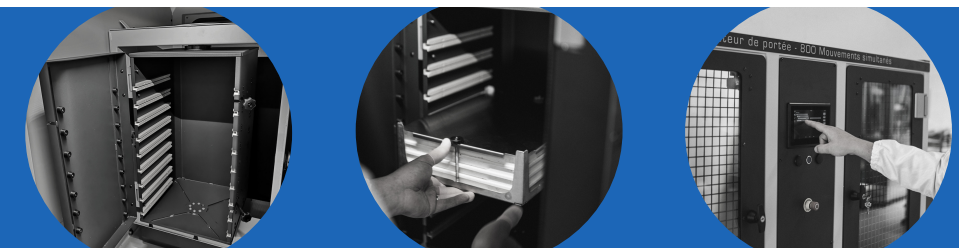

**2 independent, programmable stations** with Servo Spin software:

- + **Position** control
- + **Speed** control
- + **Acceleration and deceleration** control
- + **Communication via web browser** without software installation (PC, MAC, Linux compatible)

**Servo Spin Software** : user-friendly and flexible cycle creation

**On-board intelligence** guarantees independent operation and eliminates any disruption caused by PC updates or shutdowns.

Device for faithfully simulating the arming of a watch movement based on the rotation of 2 axes in simultaneous motion.

### SPECIFICATIONS

+ **Max. load per station:**  
30 Kg

+ **Loading capacity:**  
12 trays\*

+ **Angular orientation:**  
360° (double axial rotation)

+ **Rotation Speed:**  
3 à 100 revs.min-1

\* may vary depending on customer specifications
