

# DIVER TORQUE

Measuring and ageing bench for rotating glasses

## Torque measurement on watch head

- + Any type of rotating cycle
- + Quick and easy control solution
- + Flexible, configurable measurement cycles
- + Torque and position controllable cycles
- + Option: possibility of testing the bezel in salt water

▶ CONTROL EQUIPMENT

▶ Special machinery

▶ Aging Mechanical

▶ Watchmaking tools

# DIVER TORQUE

## ROTARY AGEING BENCH FOR ROTATING GLASSES

### Compliance system

A compliance system overcomes the sensor's eccentricity with respect to the rotating bezel axis.

### Intuitive software

Intuitive, modular software for creating different cycles. Data export :

- Average of measured torque peaks
- Angular position
- Binary result OK/KO

### Option

Diving control with the possibility of immersing the product in salt water.

### Bar code reader

Bar code reader for traceability of the measurement process.

### Stop and slide for manual adjustment

A micrometric stop ensures repeatable positioning. The manual adjustment slide engages the drive tool on the rotating steady rest.
